SUBURBAN WORKSHOPS

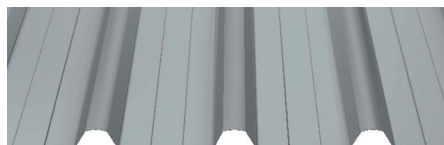

These Totalspan workshops could well be the ultimate man cave or workshop for those looking for a real steel building! The Totalspan 260 and 360 series building are for the serious customer where design and quality matter.

These buildings use a strong 80mm x 40mm portal steel framing system that you would typically find in a garage or large warehouse building. You have 6 footprints to choose from so finding your ideal workspace or escape is easy and affordable.
